

Fun & Games on ReptileChannel

By Russ Case

May 7, 2009

Take a look at the top of this page. See that "Fun & Games" link? Have you ever clicked on it before? If not, why not? Don't you like to have FUN? Don't you like GAMES?

If not, your mind may be forever changed by clicking on the link. Many different entertaining activities can be found in our Fun & Games section, everything from coloring pages for kids or others who are artistically inclined, to our Herp Hodgepodes quizzes, Feed the Beardie game, the Memory Card game and much, much more.

Our most recent additions to the Fun & Games section are the jigsaw puzzles.

Often as a kid I would be working a big jigsaw puzzle, with hundreds of pieces spread out on a green card table. If I remember correctly, they often featured a watercolor of an idyllic scene, many times featuring an old, wooden water wheel. My mom is still a big jigsaw puzzle fan, and still uses the same card table I used all those years ago. Nowadays, while there is a certain inherent charm and anticipation in spreading out a bunch of cardboard puzzle pieces, for those who don't have the space or don't want to mess with the mess, it is now possible to build jigsaw puzzles online. Oh, Technology Gods, where will you take us next?

Check out the three reptile jigsaws here. You can adjust the degree of difficulty. The more difficult you choose to make a puzzle, the smaller and more numerous the pieces you will be supplied with which to work. If you choose the easiest setting, you'll have fewer, larger pieces to manipulate. I must admit, it can get addictive. Our plan is to eventually fix it so that Reptile Club members will be able to upload their own photos and turn those into additional jigsaw puzzles. The fun never ends on ReptileChannel!

Give the puzzles a shot. I think you'll like them. Let us know what you think by leaving a comment, too. Now if you'll excuse me, I'm going to get out the card table.
