Bearded dragons (*Pogona vitticeps*)

SUBMITTED BY: William and Jan Davis, Carolina Reptiles, ncreptiles.com, 336-993-7387

BREEDER COMMENTS: "In March 2008 we hatched a clutch of bearded dragons with nine sets of twins, three conjoined twins (only 1 lived), one two-headed baby and 12 normal babies. The twins are much smaller than the normal hatchlings. All are eating and active."
